

# THIRD EYE--Vehicle Recorder

## User Manual

Thank you for choosing our product. This manual should be read before the product is activated. For safety purposes, users are advised to correctly operate the product according to this manual.

## Product overview

Thank you for choosing our vehicle recorder.

Our vehicle recorder also be called the third eye, it is a video that used to record your driving process, including images, voices, balance of the vehicle, speed, location and the status after or before accidents. It will help to investigate the reasons behind collisions, impact, and sudden acceleration accidents through the records. Users can play the recorded scenes on a PC, with the provided player software.

### ■ Functions

#### ◆ 2ch.Camera

With internal cameral(1.3M, CMOS, horizontal viewing angle 110 degree, WDR) and external camera, these two cameras can record at the same time.

(WDR: Wide dynamic display technology, redusing dazzle caused by light at night)

#### ◆ Voice prompt funtion

Machine strats, SD card detection

#### ◆ Built in GPS

Time, Date, Vehicle Speed, Direction, and GPS Coordinates (Latitude/Longitude) are overlaid onto the video image. Excellent software for post-event analysis with integrated Google Maps for route tracking, and option to export directly to Google Earth!

#### ◆ Built in G-sensor

Reflects 3D balance of the vehicle.

#### ◆ H.264 compression, MPEG4 file format

H.264 professional monitor compression, won't lose any data. MPEG4 file format, can be played in the standard software. Video, audio, vibration, speed, location can be covered in the software at the sametime.

#### ◆ Audio recorder

Built-in Mic., to record voice.

#### ◆ TV out

Display devices like car DVD, LCD etc. can be connected.

#### ◆ Successive files

The files stored continuously, it will not miss recording every second.

#### ◆ Save on SD Memory Card (up to 16GB)

When the storage of the SD card is full, it would over write the oldest saved file to save and store the new file.

◆ **Outage save**

When the car collision cause death, or car stalled normal fire, the equipment will continue to record after 30 seconds, then shutdown after saving the video files.

◆ **Emergency event recording**

When the car happened to crush or suddenly brake, the equipment will save the data in the events folder as an emergency event. Event without physical impact to the vehicle from an accident the device able to record and saved event by pressing emergency button. (manual event is saved as emergency event and length are same as 'shock ' event.

- 23) Electric quantity may reduce due to without using for a long time, to make the recorder work properly, it would be a long time when the battery is filled.
- 24) Do not use the SD card supplied with the product for any other purpose. If the SD card is used for another purpose or other files are stored in it, fatal errors may be caused. SD cards compatible with the product can be allowed, but using different SD cards may result in product malfunction. In such cases, the user is responsible for the problems.

**Note:** We do not take responsibility for any damage caused by an accident or carelessness.

## 2. Package contents

Check the objects in the packing box before using the product, if there is missing, please contact the dealer.

Purchase on selection:

- 1\* External camera
- 1\* SD card
- 1\* SD card reader

## 3. Name and function of each part

The back

- 1 In 2 Out 3 Reset 4 Power 5 LED 6 Mic 7 Up 8 Enter 9 Down
- (1)video input connect external camera
  - (2)video output connect external monitor
  - (3)reset applicable when the recorder has system fault
  - (4)power connector port power supply of the recorder, please use the standard power source
  - (5)power/recording LED status indication
  - (6)Micphone record voice
  - (7)button switch the video input (press once, built-in camera record; press again, external camera record; press once more, two camera record at the same time.)

- (8)button swith the video output (press once, switch to the picture of the other camera.)  
(9)button enmergency record (press one second) , enter into main menu( press three seconds)  
(10)SD Card slot Before use,please insert SD CARD

Disconnect the power cable or turn off the engine before Inserting or removing the SD card. The user should format the SD card before when using a SD card not supplied by the manufacturer.

- (11)Cradle socket

- (12)Front Camera

Periodically clean the lens for clear video image, to avoid lens damage , clean with a soft cloth.

- (13)Speaker

- (14) GPS antenna port

Connect with GPS antennas, to receive signal normally ,make sure the screw is tightened up before installation.

#### 4. Menu setup

Press (9) button for 3 seconds, enter into main menu as the picture below (When enter into the interface, you can hear deng's sound three times, after entering into main menu interface, (7) button upward, (8) button confirm/exit (9) button downward )

##### Main Menu

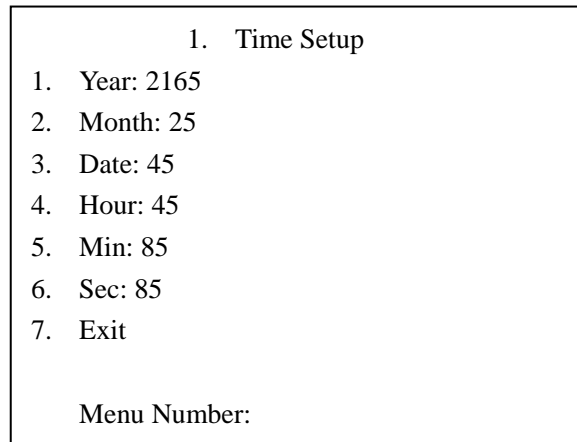

1. Time Setup
2. Record Setup
3. Camera Setup
4. SD card Info
5. ETC Setup
6. Exit

Menu Number:

1, Time Setup 2, Record Setup 3, Camera Setup 4, SD card Info 5, ETC Setup 6, Exit

➤ Time Setup

- ✧ Press confirm/exit button, enter into time setup interface. ( you can hear deng's sound two times)

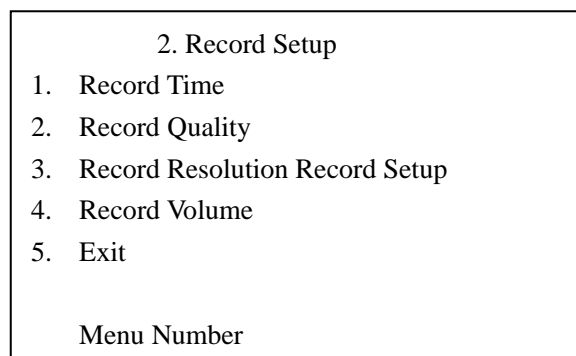

- ✧ Press confirm/exit button, enter into year setup interface, set the year by pressing the up and down button, press confirm/exit button to exit.

- ✧ Other setments has the same theory

➤ Record Setup

- ✧ Select the Record Setup at the main menu interface, enter into record setup interface

- ✧ Record hold time setup: 1 min, 5 min, 10 min;

2.1 Set Record Time
1. 1 Minute
2. 5 Minute
3. 10 Minute
Menu Number:

- ✧ Record Quality setup

2.2 Set Record Quality
1. Low
2. Normal
3. High
4. Exit
Menu Number:

<p>3.3 Set Mirror</p> <ol style="list-style-type: none"><li>1. Mirror Off</li><li>2. Mirror On</li><li>3. Exit</li></ol> <p>Menu Number</p>
---

- ✧ Camera Frame Rate Setup (1, fixed frame rate; 2, variable frame rate)

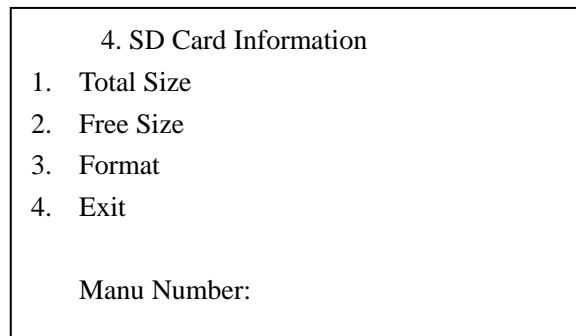

- ✧ Power frequency setup

- SD card information

- ✧ Select the SD Card Info at the main menu interface, enter into SD card information interface

- ✧ Check total size of SD card

- ✧ Check free size of SD card

✧ SD card faomat

4.3 SD card Format

Do you want to format?

1. No
2. Yes
3. Exit

Select number:

➤ Etc setup

✧ Select the Etc setup at the main menu interface, enter into setuo interface

5. Etc Setup

1. Set Acceler Trigger Level
2. Set UTC Time
3. Get Firmware Version
4. Update Firmware
5. Exit

Menu Number:

✧ Sensitive of accel trigger setup

5.1 Trigger Level

1. Trigger Level low
2. Trigger Level Middle
3. Trigger Level High
4. Exit

Menu Number

✧ Set UTC Time

5.2 Change UTC Time

Current UTC Time: 8

Users must set the UTC time according to the Timezone, or the time would be inaccuracy.

✧ Get firmware version

5.3 Get Firmware Version

Current Firmware Version

Lib 1.01. BL\_20100812.Third Eye

➤ Update Firmware

Can used to upgrade functions of the product (need manufacturer provide upgrade file, for free)

Update Instructions

Copy the update program to the SD card, then insert the card into the product. Enter into the main menu, select 5.ETC Setup, and then select 4.Update Firmware, product can automatic updates.

Note:

Do not remove the power cable and do not turn off the engine, power off during the update process may cause fatal error.

**reset:** After finishing all the previous operations and power on, but this vehicle recorder still do not record, please use a little pin press button (3), it will work normally when the machine restart. If it stil do not work, please contact the local dealer.

### 5. Installing instructions

Turn off the engine before installing, and make sure that the windshield is clean.

➤ Recommended installation position:

It would be best to fix the product at the back of rearview mirrior of the frond glass, to avoid affecting your sight. If could not, fix it on the left or ringht side of the rearview mirrior.

➤ Designskech for integral installation

The illustration above should be ajusted according to different cars.

➤ Detailed description for installation

- ✧ fix the mount with the body, as the image mounted on holder like a drawing to the body.(tear off the clear film at the bottom before using, or it can not attracted to the glasses)

- ✧ Remove all foreign materials on the window where the product will be attached to.

- ✧ Securely attach the product to the window.

- ✧ Connect cables of each part.

**Note:** To avoid influencing beauty and clean of the car, do not let the cable show up. GPS antenna must be installed vertically and upward.

## 6. Operation instruction

- Before operation

Before operating, please follow the sketch to let each part come together and mount this vehicle recorder to the most suitable place.

Insert SD Card, and this product will start working simultaneously when the cigarette lighter connected and the car started.

Be sure the power light is ON, when starting up the engine. If the power light does not light up, check the connection between parts. Remove dust or foreign substances near the cigarette lighter

socket.

**Note:** please make sure this vehicle recorder be settled stably.

➤ Operation Functions

	LED	Mark
Power on	Red lighting	Car DVR is starting
Recording	Blue flash lighting	
Press button 7	Green flash lighting	
Press button 8		
Press button 9 one time	Green flash lighting	
Press button 9 2 sec.	Green lighting	
SD card missing	Green flash lighting	Please insert SD card

**7. Internal and external cameras setting**

Internal and External Camera Mode: default

Internal Camera Mode: press the Up button once

External Camera Mode: press the Up button once

Internal and External Camera Setting for the External Monitor (Only 2CH working is effective):

Press the button (8) once, the external body camera mode is enabled.

## 8. Specification

Item	Specification	
Double camera	WDR CMOS Sensor(Angle:140)	
Video	640*480 @ 30fps(1Ch.)/15fps(2Ch.) 320*240 @ 30fps(1Ch.)/15fps(2Ch.)	
Audio	Internal Mic.	
GPS	Internal GPS Module	
Event	G-sensor(3-Axis). EMR Button	
Memory	SD Card Memory (1/2/4/8/16GB)	
Compressed Format	H. 264	
Interfaces	Power (DC 12-36V)/SD Card slot/TV-in/TV-out	
Power	Power	DC12V-DC36V
	Backup	Li-Polymer battery
Operating temperature	-10°C ~ 70°C	
Storage temperature	-20°C ~ 75°C	
Dimensions	90*50*25mm	
Weight	98G	
	Saving Time	
SD card Capacity	Front or External camera	Front + External camera
1GB	75 min.	37min.
2GB	150 min.	75min.
4GB	300 min.	150min.
8GB	600 min.	300min.
16GB	1200 min.	600min.

**Note:** according to the differences between holders, brands of memory cards, and other settings, the measurements of files and the image amount can be took will be different.

## 9. Rules for maintenance, repair and use

- The device should be mounted inside the windshield of your car. Thus events can be recorded while driving
- Avoid electric shocks and do not damage the camera's circuit
- Do not attempt to loosen the screws..
- Lens protection: clean with a soft damp cloth, do not use solvents.
- Do not store the camera in extreme cold or hot place.
- During transporting, keep away from excessive shocks and fallen.
- When camera work in higher voltage and temperature, do not run, otherwise the system could be permanently damaged.
- In case of any failure, do not continue to operate the camera.
