Operation of the GPS (Global Positioning System)

Satellite GPS (Navstar) consists of 24 satellites orbiting the earth 12, 600 mile over the ground. Time to orbit the earth is 12 hours. GPS works by receiving signals from the satellites. The satellite signal contains information indicating the position and time signals. The GPS receiver must process the difference of time in real time against the signal time and convert to distance between the current location to the reference ground locations of satellites. To locate a position precisely must have at least 4 satellites. The 3 satellites would be enough to locate any position if the earth is flat. But it is not so that the fourth satellite is needed to solve the uneven surface.

The Uses of Web Service

1. Enter to the website

Go to www.global5thailand.com and click **GPS Tracking**

2. Login

Type the Username, Password and select language. Then, click at Login

[Global5 HOME](#) [GPS PRODUCTS](#) [SUPPORT & FREE](#) [GPS KNOWLEDGE](#) [GPS TRACKING](#)

บริษัท โกลบอลไฟว์ จำกัด 132/15,16 ซอยรามคำแหง 24 แขวง 34 เขตวัฒนา กรุงเทพมหานคร 10240
Tel: 02 719 0505, Fax: 02 719 0504 www.global5thailand.com

3. Monitoring the Vehicles

Click **show map** > click **Search**

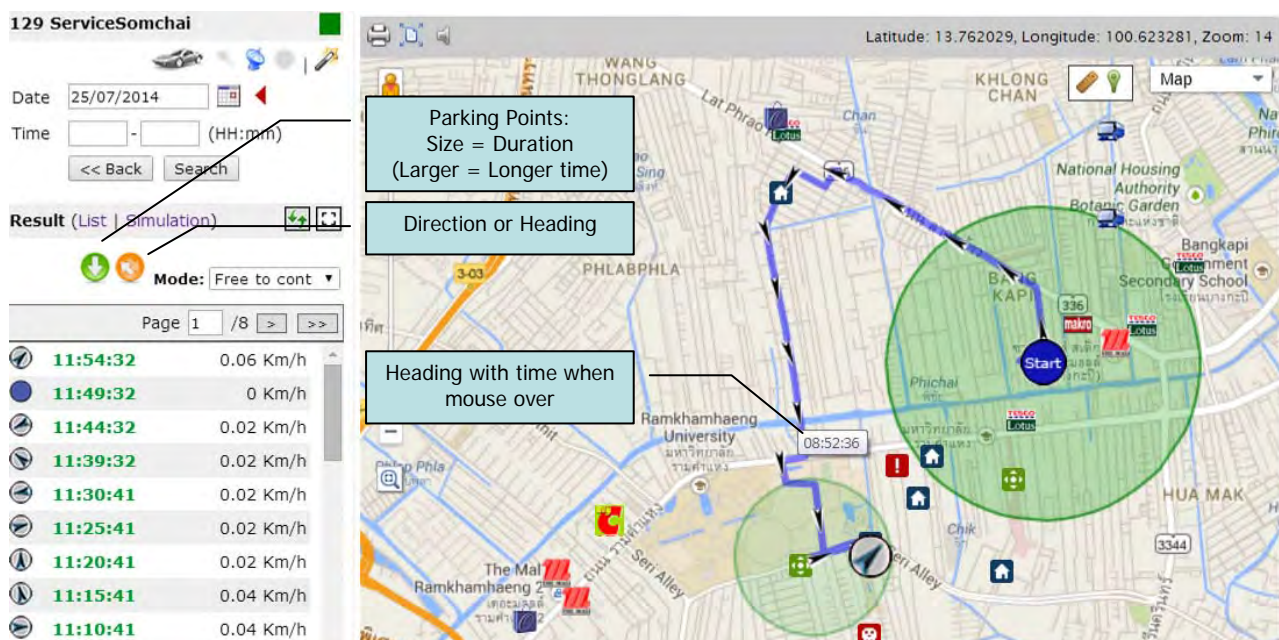

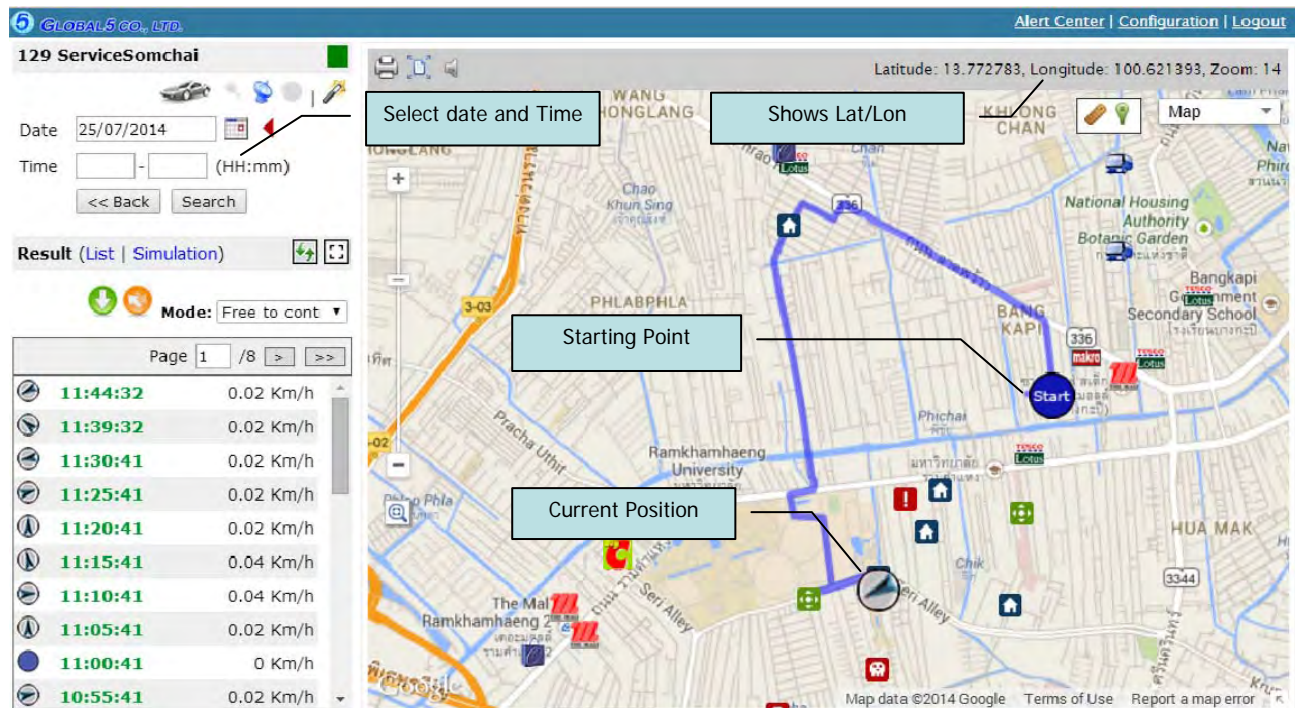

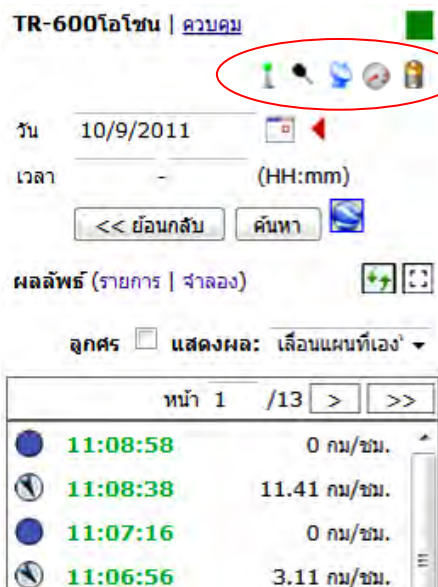

4. Select the Vehicle

5. Individual Vehicle Monitoring

Click at **History** then select date and time

TR-600 status icon

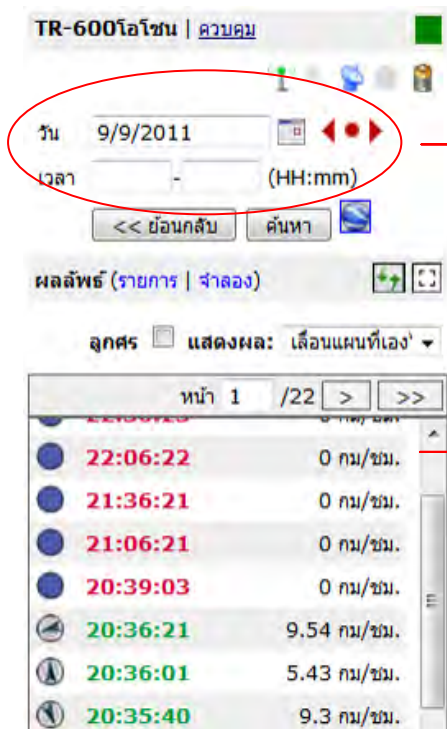

Connect to the antenna. If grey, means antenna is damaged or disconnected.

Engine is on. If grey, means engine is off.

Received the satellite signal. If grey, lost satellite signal reception.

Motion Sensor activated. If grey, cannot detect movement.

Connect to external power source. If grey, power cord is disconnected.

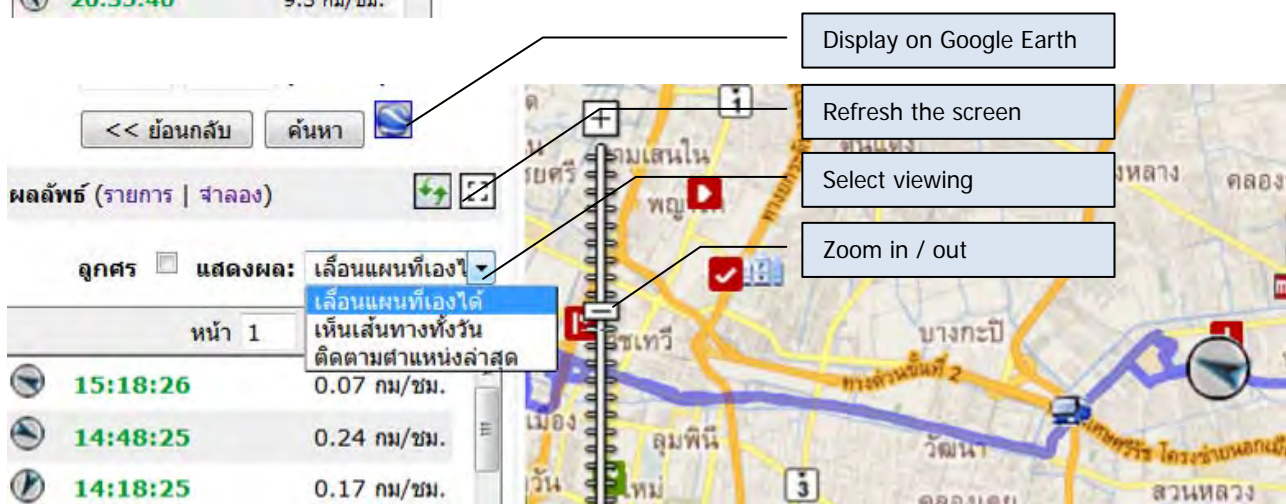

Connectivity to the server status:
Green means connect to the server.
Red means no connection.

Viewing the past records

- Select date or click the red arrow to forward or backward.
- Red dot for current date
- Type in start and end time for particular period

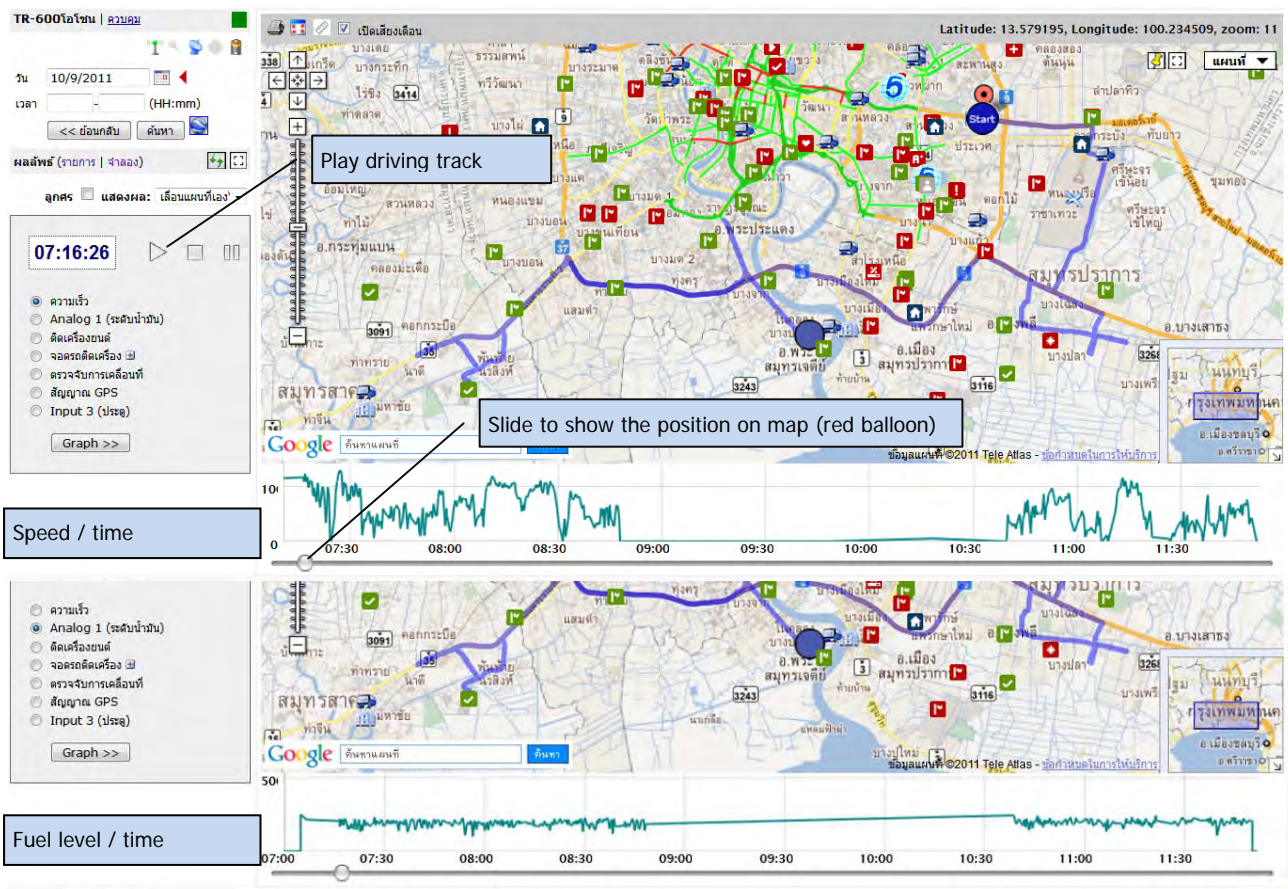

The records

- means no movement
- show heading
- Time in red means lost satellite signal reception
- Time in green means received the satellite signal

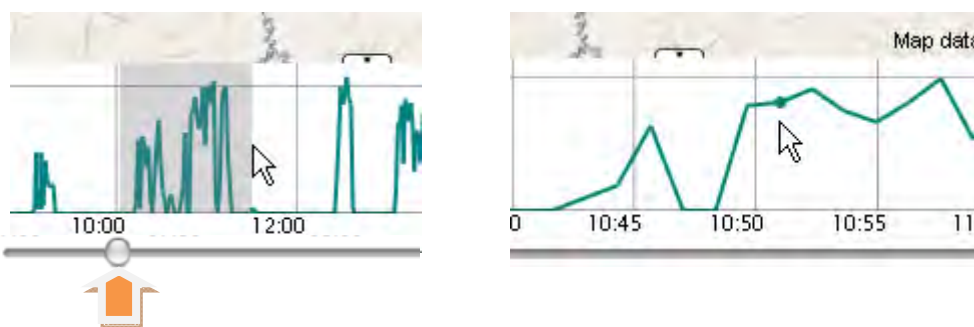

6. Simulation

Click **Simulation** to simulate the track and other parameters such as fuel level, engine status and etc.

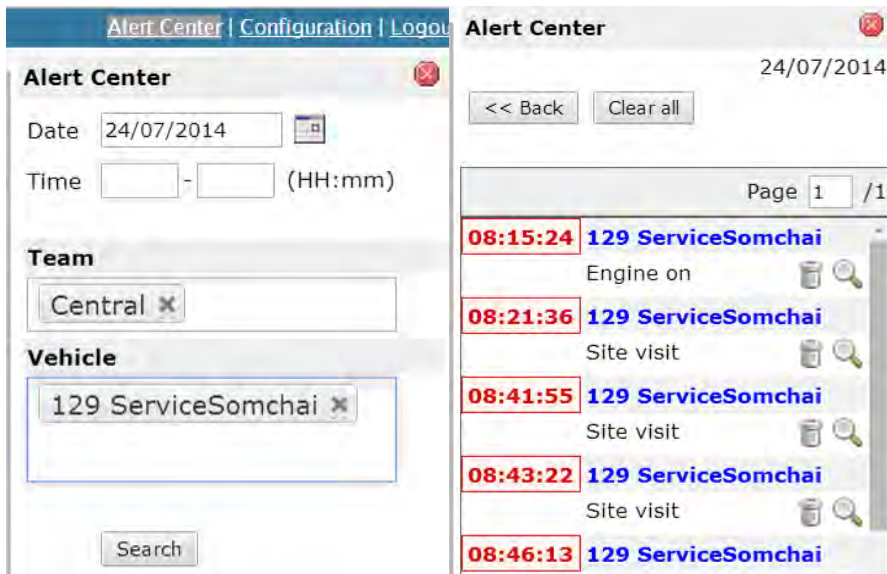

Click at and drag within the Graph area to zoom for the interesting period (Double Click for reset to full period)

Click and drag the Slider bar to show position (recommend using with Firefox or Chrome for quick response)

7. Alert Center for monitoring events of yours choice

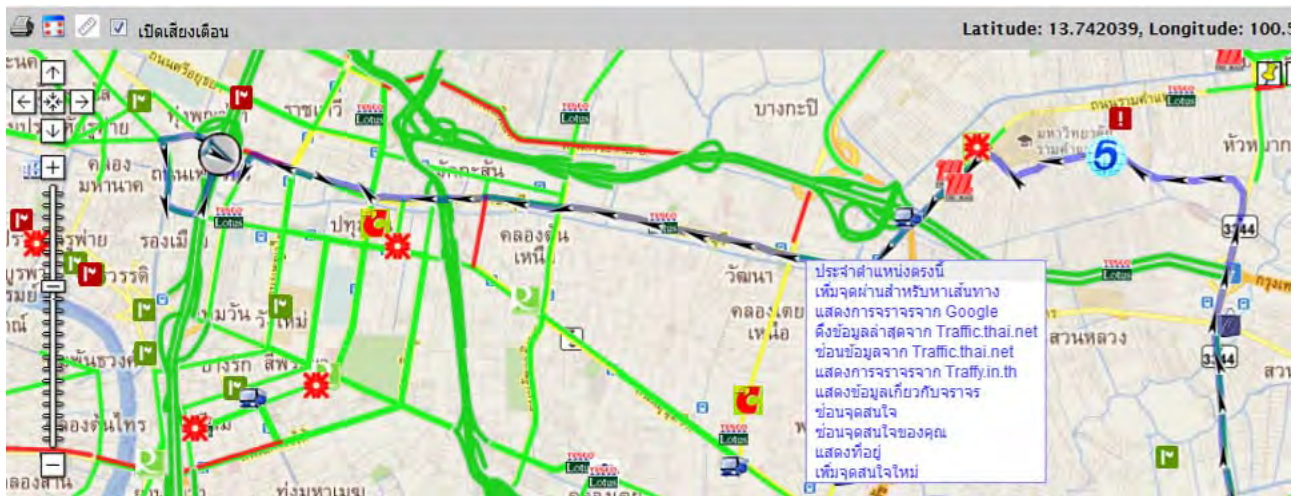

Search vehicles near the POI

Click [Site view](#), select pre-recorded POI from the list, type radius and click search or right click at any place of the map, select Site View.

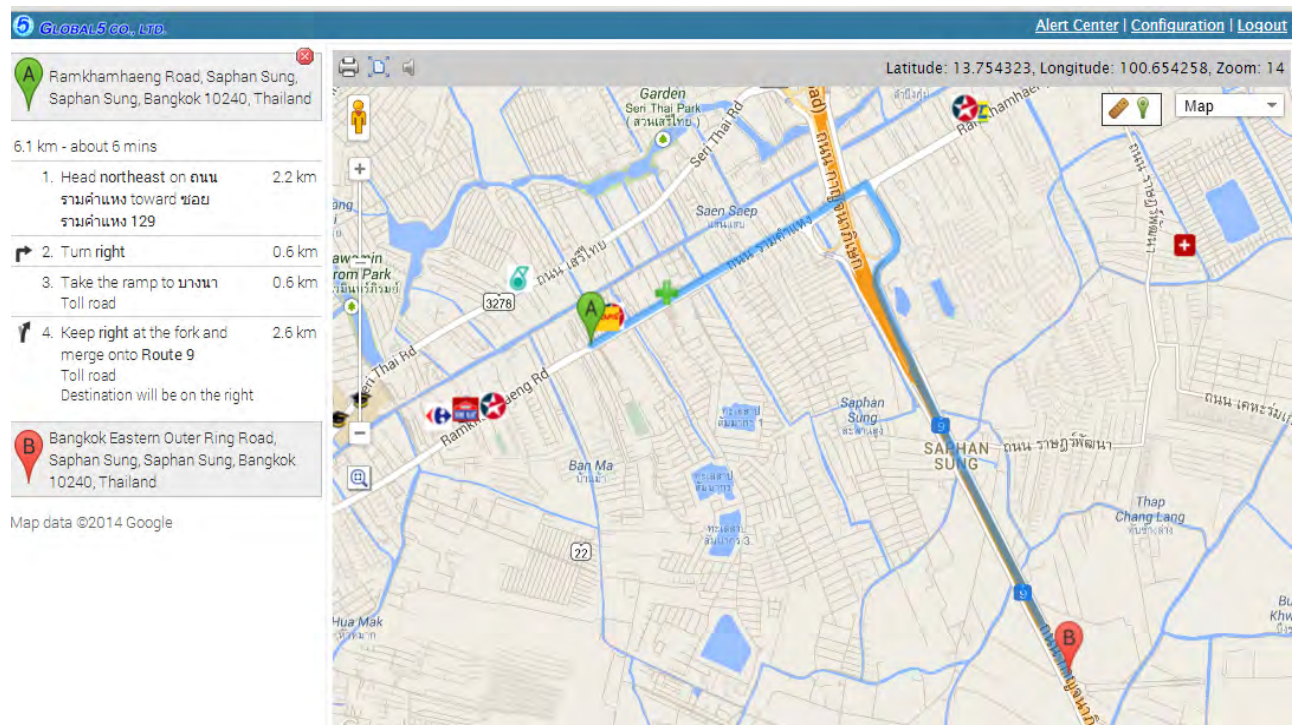

8. Traffic Information

Right click and select **Show Traffic**. There will be the traffic information.

9. Route Creation

Right click and select **Add waypoint**, repeat the steps for destination. The route will be appeared on the map.

10. Satellite View

17. Sub Account and Privilege Setting

Sub account is for setting privilege of each user to view or control of website. To set the sub account, click at Manage User Group > Add new Group > Set Privilege > Add new user

The screenshot shows the 'Manage User Group' interface. On the left is a sidebar menu with 'Manage User Group' circled in red. The main content area has a table with the following data:

Group Name	Member count	
Central	2	Member Edit & Set Privilege Privilege on Team
test2	2	Member Edit & Set Privilege Privilege on Team

Below the table is a note: 'Can delete blank group only'. An arrow points from the 'Edit & Set Privilege' link for 'test2' to a modal window titled 'Edit User Group'. The modal contains:

- Group Name: test2
- Member**
 - bb [bb]
 - max [max]
- Privilege**
 - ☐ Have all privileges
 - ☒ Have speific privileges
 - ☒ Map
 - ☒ Map - History
 - ☒ Map - SOS
 - ☐ Manage Team
